- Come up with solutions to seemingly intractable problems.
- Ability to handle highly stressed situations and unexpected errors in an efficient manner.
- Passion for building reusable UI components.

## WORK EXPERIENCE

06/2021 – present

### Software Engineer Veritone

As a *Software Engineer* at Veritone, I specialize in leading the development of innovative front-end applications that incorporate AI to address the needs of internal business units. With only under 2 years of experience at the company, I have played a crucial role in building Veritone Voice - a game-changing application that produces lifelike AI voices at unmatched speed and scale. Additionally, my front-end expertise has been instrumental in the integration of Veritone Tracker - a powerful tool that helps investigators track individuals across videos while maintaining the privacy of their personally identifiable information and not to mention Cerebro Speech to Text in real time that will be capable of to process 40 streams in real-time. Driven by a passion for technology and a commitment to excellence, I am always seeking new challenges and opportunities to further advance my skills and make a positive impact in the industry

Internal Rewards

- ★ 2022 Electrifying (VERI Values) Nominee
- ★ 2021 Rookie of the Year

05/2019 – present

### Brad Smith Veritone

I thoroughly enjoyed my time working with Christian, and came to know him as a truly valuable asset to any team. He is honest, dependable and incredibly hard-working. I am impressed with his professionalism and interactions with fellow co-workers.

His knowledge of latest edge web frameworks and eye for detail was a huge advantage. He has been a great help with turning out new material that has resulted in a better customer experience and higher revenue. Along with his undeniable talent, Christian has always been an absolute joy to work with. He is a true team player, and always manages to foster positive discussions and bring the best out of other employees.

### Greg Loose

Christian is a special developer who is thoughtful from idea iteration with designs, to wiring those up in code, and implementation to backend services. He takes pride in his work and works relentlessly to finish his projects to meet deadlines. He also makes his code and tools better for the next developer, helping write useful documentation and better tools to make a better developer to DevOps experience
